**DETAILED ACTION**

***Claim Rejections - 35 USC § 112***

1. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

2. Claims 1-4 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

In claim 1, lines 10-11, it is not clear how “a high frequency amplifier” different from the one in lines 1-2.

***Claim Rejections - 35 USC § 102***

3. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

4. Claim 1 is rejected under 35 U.S.C. 102(b) as being anticipated by Igarashi et al. (5,940,143).

Regarding claim 1, Igarashi shows a high frequency amplifier (30,70), a mixer (40), a SAW filter (90), an intermediate frequency amplifier (100), and a switch signal generating means (160-180) and switching circuit (190), which meet the wide band detecting means as claimed because the switch signal generating means detects co-channel interferences and the switch circuit provides or generates a AGC signal (see col. 7, lines 34-37). Basically, the AGC signal to RF amplifier 30 is generated based on

the channel interference condition detected by switch signal generator (160-180) through switching circuit 190.

***Allowable Subject Matter***

5. Claims 2-3 would be allowable if rewritten to overcome the rejection(s) under 35 U.S.C. 112, 2nd paragraph, set forth in this Office action and to include all of the limitations of the base claim and any intervening claims.

***Conclusion***

6. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

Yamamoto (6,831,705) shows an AGC circuit.

Fang (6,118,499) shows a mixer.
